

## 4 Step Quick Programming Instructions for WSER Motors

### Step 1: Add Motor to Remote

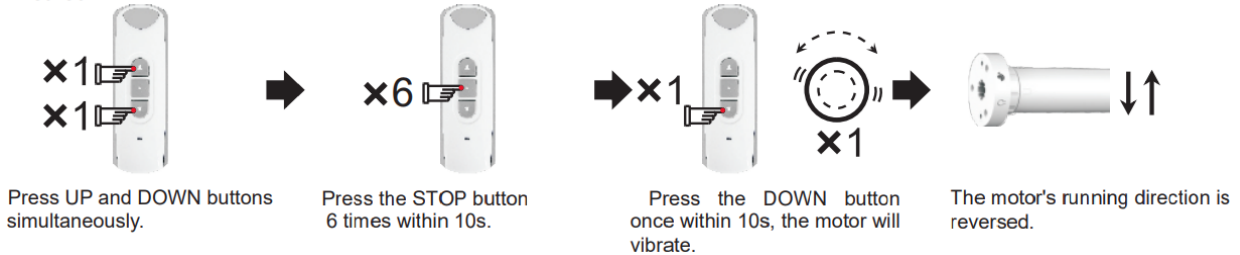

### Step 2: Check Direction

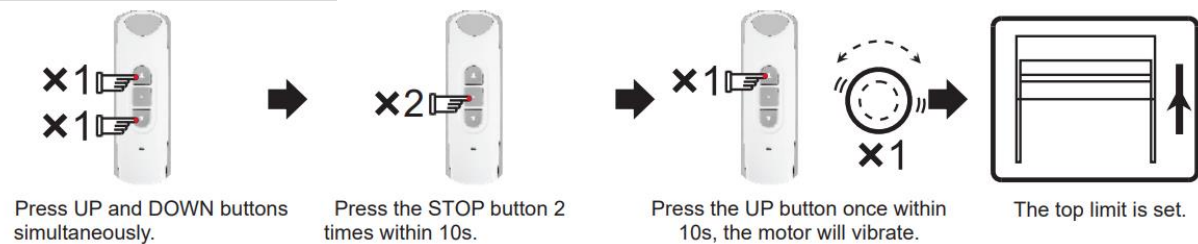

Method A.

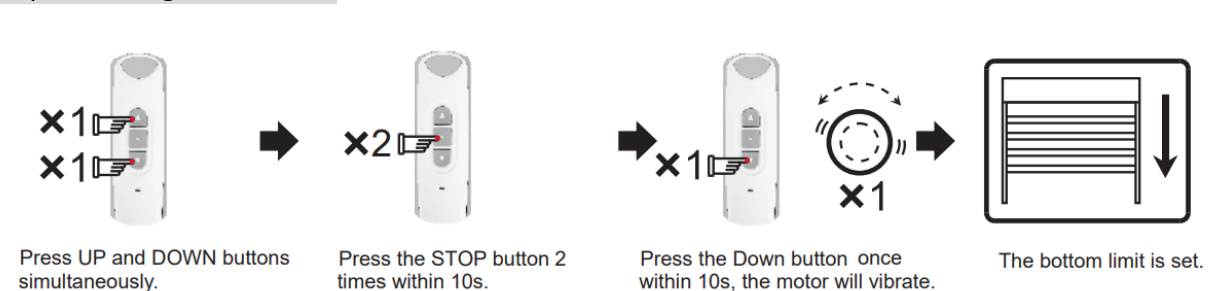

Method B.

### Step 3: Setting Upper Limit

### Step 4: Setting Lower Limit

Step 4 continued...High five yourself! You are done! Move on to the next one! You can program all shades while powered on. No sleep modes, no power cuts and definitely NO paperclips...you never need to get to the motor head again. Everything can be done from the remote. See advanced instructions for more tricks customizations! **MOTORIZATION.MADE.EASY.**
